Our government should concentrate on protecting our companies and industries like other countries in the world do. Trying to destroy one of our own companies losses sight of the people that make up these companies. Individuals with families, raising their children that will become the future leaders, doctors, workers and patriots. Our laws should be used to build, not tear down efforts that create better conditions in our society. Encourage those who are willing to take the risk, make the extra effort to be successful not only for themselves but for their many employees as well. Reward effort, not whiners who are looking for a free ride or someone else to carry their fair load.  
Government should not try to legislate success, only opportunity!
